### JURISDICTION AND PROCEDURAL HISTORY

This case is before the undersigned on a request for hearing dated December 18, 2012 (20 CFR 404.929 et seq.).

The evidence of record supports a fully favorable decision; therefore no hearing has been held (20 CFR 404.948(a)). Mr. Militon D. Rivera-Adames, an attorney, represents the claimant.

The claimant is alleging disability since June 30, 2011.

### ISSUES

The issue is whether the chimant is disabled underfections 216(i) and 223(d) of the Social Security Act. Disability is defined as the matality to engage in any substantial gainful activity by reason of any medically determinable physical or mental impairment or combination of impairments that can be expected to result in death or that has lasted or can be expected to last for a continuous period of not less than 12 months.

There is an additional issue whether the insured status requirements of sections 216(1) and 223 of the Social Security Act are met. The claimant's earnings record shows that the claimant has acquired sufficient quarters of coverage to remain insured through December 31, 2016. Thus, the claimant must establish disability on or before that date in order to be entitled to a period of disability and disability insurance benefits.

After careful review of the entire record, the undersigned finds that the claimant has been disabled from June 30, 2011, through the date of this decision. The undersigned also finds that the insured status requirements of the Social Security Act were met as of the date disability is established.

### APPLICABLE LAW

Under the authority of the Social Security Act, the Social Security Administration has established a five-step sequential evaluation process for determining whether an individual is

See Next Page

380

disabled (20 CFR 404.1520(a)). The steps are followed in order. If it is determined that the claimant is or is not disabled at a step of the evaluation process, the evaluation will not go on to the next step.

At step one, the undersigned must determine whether the claimant is engaging in substantial gainful activity (20 CFR 404.1520(b)). Substantial gainful activity (SGA) is defined as work activity that is both substantial and gainful. If an individual engages in SGA, he is not disabled regardless of how severe his physical or mental impairments are and regardless of his age, education, or work experience. If the individual is not engaging in SGA, the analysis proceeds to the second step.

At step two, the undersigned must determine whether the channet has a medically determinable impairment that is "severe" or a combination of impairments that is "severe" (20 CFR 404.1520(c)). An impairment or combination of impairments is "severe" within the meaning of the regulations if it significantly limits an individual's ability to perform basic work activities. If the claimant does not have a severe medically determinable impairment or combination of impairments, he is not disabled. If the claimant has a severe impairment or combination of impairments, the analysis proceeds to the third step.

At step times, the undersigned must determine whether the claimant's impairment or combination of impairments is of a severity to meet or medically equal the criteria of an impairment listed in 20 CFR Part 404, Subpart P, Appendix 1 (20 CFR 404.1520(d), 404.1525, and 404.1526). If the claimant's impairment or combination of impairments is of a severity to meet or medically equal the criteria of a listing and meets the duration requirement (20 CFR 404.1509), the claimant is disabled. If it does not, the analysis proceeds to the next step.

Before considering step four of the sequential evaluation process, the undersigned must first determine the claimant's residual functional capacity (20 CFR 404.1520(e)). An individual's residual functional capacity is his ability to do physical and mental work activities on a sustained basis despite limitations from his impairments. In making this finding, the undersigned must consider all of the claimant's impairments, including impairments that are not severe (20 CFR 404.1520(e) and 404.1545; SSR 96-8p).

Next, the undersigned must determine at step four whether the claimant has the residual functional capacity to perform the requirements of his past relevant work (20 CFR 404.1520(f)). The term past relevant work means work performed (either as the claimant actually performed it or as it is generally performed in the national economy) within the last 15 years or 15 years prior to the date that disability must be established. In addition, the work must have lasted long enough for the claimant to learn to do the job and have been SGA (20 CFR 404.1560(b) and 404.1565). If the claimant has the residual functional capacity to do his past relevant work, the claimant is not disabled. If the claimant is analysis proceeds to the fifth and last step.

At the last step of the sequential evaluation process (20 CFR 404.1520(g)), the undersigned must determine whether the claimant is able to do any other work considering his residual functional capacity, age, education, and work experience. If the claimant is able to do other work, he is not

See Next Page

386

disabled. If the claimant is not able to do other work and meets the duration requirement, he is disabled. Although the claimant generally continues to have the barden of proving disability at this step, a limited barden of going forward with the evidence shifts to the Social Security Administration. In order to support a finding that an individual is not disabled at this step, the Social Security Administration is responsible for providing evidence that demonstrates that other work exists in significant numbers in the national economy that the claimant can do, given the residual functional capacity, age, calcultion, and work experience (20 CFR 404.1512(g) and 404.1560(c)).

### FINDINGS OF FACT AND CONCLUSIONS OF LAW

After careful consideration of the entire record, the undersigned analyss the following findings:

- 1. The cisimum's date last inswed is December 31, 2016.
- 2. The cinimant has not engaged in substantial gainful activity since June 30, 2011, the alleged ower date (20 CFR 404.1520(b) and 404.1571 et seq.).
- 3. The claimant has the following severe impairments: high blood pressure, lumbar degenerative disease, and branchial astinua (20 CFR 494.1520(c)).
- The undersigned Administrative Law Judge finds that the severity of the claimant's
  impairments medically equals the criteria of section 1.04 A of 20 CFR Part 404, Subpart P,
  Appendix 1 (20 CFR 404.1520(d), 404.1525 and 404.1526), since June 30, 2011.

The severity of the claimant's impairments medically equal listing 1.04 A, based on written interrogatory submitted by impartial medical expert Dr. Jose E. Rolon-Rivera, specialized in internal medicine. This listings refers to musculoskeletal disorders of the spine (e.g., herninted nucleus pulposus, spinal arachnoiditis, spinal stenosis, osteoarthritis, degenerative disc disease, facet arthritis, vertebral fracture), resulting in compromise of a nerve root (including the canda equina or the spinal cord. The A criteria of this listings refers to nerve root compression characterized by neuro-anatomic distribution of pain, limitation of motion of the spine, motor loss (atrophy with associated annucle weakness or muscle weakness) accompanied by sensory or reflex loss and, an if there is involvement of the lower back, requires positive straight-leg raising test (sitting and supine). In this particular case, in his written interrogatory (Ex. 13F) Dr. Rolon-Rivera reports the following:

- The claimant has musculoskeletal condition. He has chronic low back pain. There is
  evidence of herninted nucleus pulposus LA-L5 and bilateral neural stenosis. He has L5
  irritability and S1 radiculopathy. There is evidence of LA-5 lateral stenosis and L5-S1
  disc bulge and annular tear and central canal stenosis.
- 2) The claimant has respiratory condition. He has bronchial asthma.
- 3) The claimant has cardiovascular condition. He has high blood pressure

Based on the above evidence, Dr. Rolon-Rivera opined that the chimant's imaginaent equals listing 1.04 A since June 30, 2011. He based his opinion on exhibits 1F, 2F (3R at 2, 6, 11, 14, 18, 19, 20, 23, 24, 25, 27, 29, 33, 40, 41, 61, 63, and 68, and 10F at 2, 3, 4, 5, 6, and 12. I concur.

In making this finding, the undersigned considered all symptoms and the extent to which these symptoms can reasonably be accepted as consistent with the objective medical evidence and other evidence, based on the requirements of 20 CFR 404.1529 and SSRs 96-4p and 96-7p. The undersigned has also considered opinion evidence in accordance with the requirements of 20 CFR 404.1527 and SSRs 96-2p, 96-6p and 06-3p.

The record evidence shows the claimant is 41 years old veteran. He has a high school education plus three years of college. His primary language is Spanish. He is able to communicate in English. The record evidence shows the claimant stands 6'1" in height and weighs 252 pounds. His work experience includes the following. Data entry, Heavy Wheel Vehicle Mechanic, Ramp Agent at Airport and he last worked as Salesperson for truck parts center. The record shows a good earnings record until 2011, when he could no longer continue working.

The claimant alleges disability since June 30, 2011 at age 39, due to back condition, hypertension, and asthma. He reports severe pain with difficulty sleeping, requiring the use of medications. He also reports difficulty bathing, dressing, walking, and concentrating due to pain. He reports uses a cane due to severe paining land difficulty managing stress, and isolates (Ex. 4E).

Medical evidence from the State Insurance Fund (SIF) shows on May 27, 2009, the claimant had a work accident on May 27, 2009. The claimant has filed four cases through the SIF and there is documented history of high blood pressure and bronchial asthma. The low back pain is associated to work accident while lifting oil containing (Ex. 3F).

On November 22, 2010, the claimant had an abnormal Nerve Conduction Study of Motor Nerves, including right leg abnormalities in muscles innervated by L5 root by mostly S1 root, L5 root irritability and right S1 radiculopathy. An MRI study revealed degenerative esteoarthritic changes of the lumbosacral spine, posterior disc herniation L2-L3, posterior disc bulge at L3-L4, posterior disc herniation L4-L5 with bilateral neural foramina stemosis and posterior central disc herniation L5-S1 (Ex. 1F).

On April 9, 2012, consultative neurologist Dr. Hector R. Stella-Arrillaga documented findings of blood pressure reading at 150/80. On that date, the claimant weighed 249 pounds.

The claimant had tendemess to palpation to right hamstring and to palpation of hambosacral area. Forward bend was 30 degrees, lateral movements 10 degrees. The claimant was unable to squat, kneel or walk on heels and toes due to pain. Gait was slow and antalgic, using a cane on right hand. There was evidence of decreased pinprick sensation on right leg LA-L5, S1 dermatome. The deep tendon reflexes were positive bilaterally in the lower extremities.

388

Dr. Stella-Arrillaga diagnosed the claimant with husbosacral sprain, hermated nucleus pulposus

1.2 1.2-1.3, 1.3-1.4, 1.4-1.5 and 1.5-S1 and right hassistring sprain. He opined that the claimant does

need a cane for walking, and prognosis is very poor (Ex. 4F).

Pi Progress notes from SIF shows in December 2011, MRI findings include the following findings:

Misaligument at L2 on L3 and L3 on L4; grade I retrolisthesis;

Generalized estemphyte formation and disc dislocation and narrowing of the intervertebral

Hypertrophy of the apophyseal joints; L2-L3 and L3-L4 central canal stenosis secondary to posterior disc balges;

LA-L5 central and lateral canal stenosis secondary to posterior disc bulge;

Hypertrophy of the apophyseal joints;

L5-S1 diffuse posterior disc bulge; central annular tear with central canal stenosis.

On James 31, 2013, the SIF physician diagnosed the claimant with recurrent extraded humbar disc (Ex. 12F).

After considering the evidence of record, the undersigned finds that the claimant's medically determinable impairments could reasonably be expected to produce the alleged symptoms and that the claimant's statements concerning the intensity, persistence and limiting effects of these symptoms are generally credible.

Because the record does not contain any State agency medical opinions, SSR 96-6p does not apply.

Great weight is given the opinion of impartial medical expert Dr. Jose E. Rolon-Rivera, as the substantial and credible evidence supports him. He had the opportunity to review the entire file including additional evidence submitted at the bearing level. He has knowledge of the Social Security Administration's disability review requirement, and his opinion is consistent with the opinions and observations expressed by other medical sources.

5. The claimant has been under a disability as defined in the Social Security Act since Tune 30, 2011, the alleged onset dute of disability (20 CFR 484.1520(d)). Disability has asted 12 consecutive months or more.

DECISION

Based on the application for a period of disability and disability insurance benefits protectively iled on August 9, 2011, the claiment has been disabled under sections 216(1) and 223(d) of the locial Security Act since June 30, 2011
